validated, relevant, real time
risk alerts, reports, analytics
and AI to support proactive risk
identification and effective
mitigation.

RiskAlerts.net

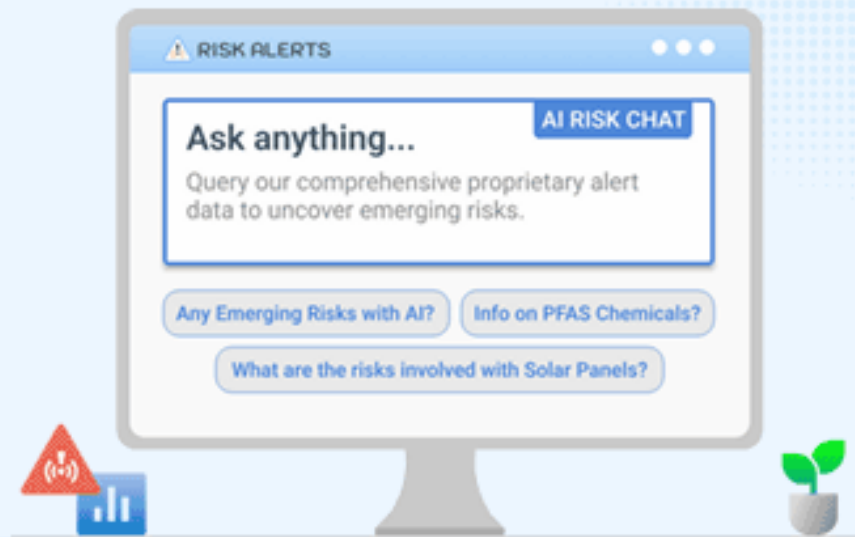

service@brmservices.com.au

Now Enhanced with AI

AI is a major breakthrough for RiskAlerts, transforming vast volumes of data into clear, accessible, and actionable insights — through an interface that's simple, intuitive, and easy for everyone to use. Stay ahead of AI, not behind it.

Why RiskAlerts AI Delivers Accuracy Other AIs Can't Match

RiskAlerts AI leverages our exclusive proprietary dataset (updated daily) to power our AI, ensuring:

- ✓ **All alert data is reviewed and validated by our experienced risk specialists**
- ✓ **Our AI makes no assumptions — insights are based solely on verified risk alerts**
- ✓ **Over 2,000+ curated alerts form the foundation of our AI's intelligence & analysis**
- ✓ **Our Proprietary data is exclusive to RiskAlerts AI — not available anywhere else**

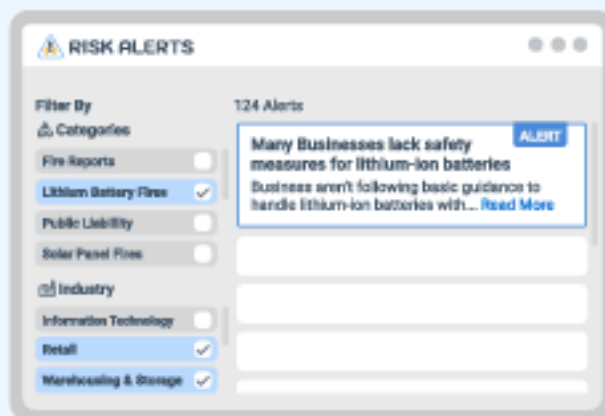

RISK ALERTS

SOLUTION

Real-Time Global Risk Alerts

At the heart of our platform, **RiskAlerts.net** scans the world for emerging threats — delivering instant, verified alerts and empowering you to proactively manage risks before they escalate.

- ✓ **Real-Time Global Alerts** – Continuous monitoring and alert system for emerging risks, geopolitical, environmental, market, and regulatory risks.
- ✓ **Searchable Risk Alert Data** – Access our proprietary and continuously expanding database of over 2,000 alerts
- ✓ **Reports, Analytics & Support** – Comprehensive reports, actionable analytics, and expert guidance that transform risk data into practical, operational solutions.

Turning Data into Actionable Strategies

In today's fast-moving world, risk managers need accurate, real-time intelligence to anticipate threats and safeguard their organisations.

By staying proactive, strategic, and operationally prepared, you position your organisation as a risk-resilient leader, ready to detect threats early, strengthen governance, and support critical business functions.
